Install Modules From Your Old Laptop

`python` `linux`

Method 1: pip

```
1.   pip freeze >mymodules.txt #export a list of your modules in old laptop
2.   pip install -r mymodules.txt
```

Method 2: anaconda

```
1.   #note that you need to create and activate an environment first
2.   conda env export > oldenv.yml
3.   conda env create -f oldenv.yml
```
